Mr. Lynn Kunzler:

In accordance with the regulations put forth by DOGM, W.W. Clyde and Company hereby notifies DOGM that mining operations have commenced under the Small Mining Permit #S0490070. Operations began upon verbal approval from DOGM on Tuesday, April 14<sup>th</sup> 2009. It is anticipated that the duration of mining for this phase will be complete by the end of the summer or early fall 2009. However, that may be subject to change based on material needed for current and future projects.

Please feel free to contact me at this email address anytime, or at the phone numbers listed below if you have any questions. In concurrence with regulations, we have delimited the boundary of the small mine permit with T-Posts and have stockpiled topsoil for future reclamation and revegetation.

We appreciate the help we have received throughout this process from DOGM and look forward to finalizing our Large Mine Permit for this same property in the near future.

Sincerely,

*Lance Greer*
